Kaduna**

Dear Sir,

RE: FUEL STICK [MARKETED BY FUEL STICK NIG LTD]

I consider it necessary to express my experience on the above after usage for nearly one year on my MOTOR VEHICLES AND GENERATING SETS for the interest of others who might want to use the Fuel performance enhancement Stick.

At the time it was introduced to me by a friend, despite the fact that he gave a sample free, I did not want to use it because of my conviction. When I then decided to use it, I started with my Cars, a Mercedes C230, a Toyota Corolla, a BMW and a Nissan Prameira. It was difficult initially to appreciate the product better until I had cause to do long distance journeys.

I discovered the vehicle moved extra fine, smoother and the fuel consumption reduced. During the cold season, my car started well most of the time at just one crank.

There was this day I did not carry the Fuel stick with me and on my way back to Kaduna, I refueled at Abuja and I did not need an Automobile specialist to explain the difference in performance.

The generating sets [Petrol and Diesel engines] have recorded less problems since the introduction of the Fuel Stick. At this difficult time, prudent individuals and organizations need this to cut down on cost of running our Motor vehicles and Generating Sets.

Celestine Ike Okai
