Dear Mr Benson,

RE: TESTING OF FUEL STICK, FUEL CONDITIONER

I write further to conducting two different tests with Fuel Stick, Fuel Conditioner. We wish to inform you we were pleased with the performance of the product. Kindly find attached the results of both tests we conducted.

Test 1 (Trip Dar Es Salaam to Arusha & Back)

We drove a Toyota VX Land Cruiser , before we left Dar Es Salaam the car had a full tank which took us as far as Moshi at which point we needed to refill the tank to finish our trip to Arusha. On our way back we introduced Fuel Stick and fill the tank, which allowed us to return to Dar Es Salaam without needed to refill the car. When we got back to Dar Es Salaam we still had quarter of a tank of fuel which equated to a 24% saving in comparison with our journey without Fuel Stick.

Test 2 (The Product Was Used On Our Borehole Drilling Equipment)

We monitored the fuel consumption while drilling a borehole over a 3 day period with and without Fuel Stick and with the product we recorded savings of 18%.

Considering that the product also cleans the fuel system and compression chamber and will eventually reduce our maintenance costs as well as our overall cost of fuel, we would highly recommend it.

Yours sincerely,

Lewis Kopwe
