

The Director,

Fuel –Stick India Pvt. Ltd.

Chandigarh.

India

Dear Sir:

Sub: Performance Report of Fuel-Stick on SET (400 KVA kirlosker engine)

On 21 March 2010

This is in reference to the trial conducted on our factory generator 20<sup>th</sup> March 2010 to 21.03.2010 to study the use of FUEL STICK and its effect on the DG fuel consumption pattern.

We are happy with the performance of your product & would like to inform that it has given us reduction in fuel consumption by approximately 17.33% . As we had average of 60 ltr per hours without fuel stick and with treatment of fuel stick to our diesel in generators set we are getting average of 49.6 ltr/per hours

In addition to saving fuel it has also reduced the sound of gensets which is very usefull for keeping environmental noise under control.

As informed by you as well as noticed by us that it reduces carbon emissions making it environment friendly and In long run will keep our engine healthy and reduce maintenance.

We are quite happy with the product performance and we are recommending the same to our management for using this product.

Thanks & regards.
