The Director,
Fuel-Stick India Pvt.Ltd.
Chandigarh,
India.

Date: 02.04.2010

Dear Sir:

**Sub : Performance Report of Fuel-Stick on DG SET (750 KVA Cummins engine)
on 2nd April 2010**

This is in reference to the trail conducted on our factory generator on 27th March 2010 to 31.03.2010 to study the use of FUEL STICK and its effect on the DG fuel consumption pattern.

We are happy with the performance of your product & would like to inform that it has given us reduction in fuel consumption by approximately 20 %. As we had average of 3.4 unit / ltr without fuel stick and with treatment of fuel stick to our diesel in all three generators set we are getting average of 4.1 units / ltr.

In addition to saving fuel it has also reduced the sound of gensets which is very useful for keeping environmental noise under control.

As informed by you as well as noticed by us that it reduces carbon emissions making it environment friendly and in long run will keep our engine healthy and reduce maintenance.

We are quite happy with the product performance and we are recommending the same to our management for using this product.

Thanks & regards,
For Nilkamal Ltd.

(BR Chauhan) G.M.
