To,
The Director,
Fuel-Stick India Pvt.Ltd.
Chandighrah,
India.

Dear Sir:

Sub : Performance Report of Fuel-Stick on our Generator 62KVA

These refers to above subject matter and the trial conducted on our factory Generator on Recently.

This is to confirm that we are satisfied with the performance of your product, Fuel Stick Fuel Conditioner.

The **actual reduction in fuel consumption was 25 %** compared to our earlier average consumption.

The average output of the our generator was 9 lts per hour and it reduced to 6.75 lts per hour when the fuel was treated with Fuel Stick Fuel Conditioner.

In addition to the reduced consumption, it was observed that the sound level of the Generating Sets as well as the opacity of the exhaust emissions came down considerably.

We are very happy with the product performance.

Thanks & regards,

Nagra Engg Plastic Co
